

TCRM Therapist – Software Activation...

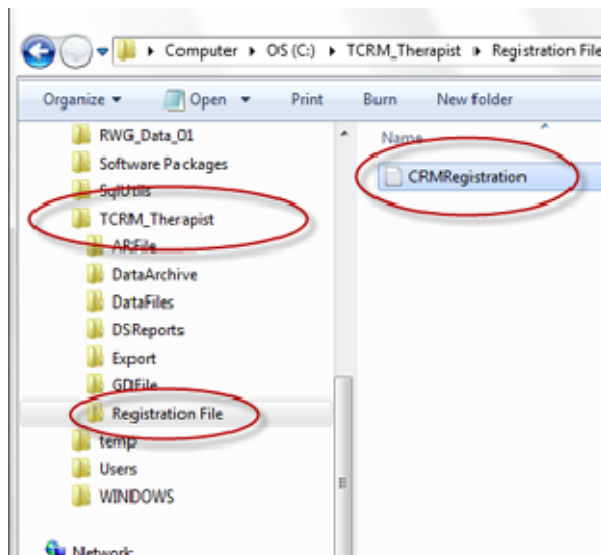

When you first installed the system you may recall clicking on the button [Build Software Registration File] which created a file:

CRMRegistration.txt

The file referred to above can be found within the **C:\TCRM_Therapist** folder under the sub folder **RegistrationFile** as displayed in the example opposite.

The contents of which can be viewed via any text editor should you wish to review the contents before submitting the file to Tzaka Holistic by attaching it to an email with the subject heading **Software Registration** as outlined below.

We prefer that the file be attached to the email as demonstrated opposite as the registration process and activation key allocation is an automated process.

If you prefer you can copy the contents of the file **CRMRegistration.txt** to the software registration email but this method of registration will result in a delay as your software registration will require manual verification.

A return email will acknowledge your software registration and provide a software activation key which should be entered via the Software Activation screen.

Please note the code displayed in this example refers to the software version which may differ when viewing the software activation key screen on your version of the application.

This email should be kept as proof of the right to run the TCRM Therapist application on the registered computer system. Should the transfer of the licence to another computer be required re-registration will be necessary.
